DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7 and 24-25, drawn to a peptide based contrast enhancement agent and a kit comprising said agent, classified in class 424, subclass 9.1.
 - II. Claims 8-9, drawn to a method of preparing a peptide based contrast enhancement agent, classified in class 424, subclass 9.1.
 - III. Claims 10-23, drawn to a method of using a peptide based contrast enhancement agent for generating a visible image of a biological sample, classified in class 424, subclass 9.1.
2. The inventions are distinct, each from the other because:

Inventions of Groups I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the protein of group I can be made by post-translational modification or chemical modification.

Inventions of Groups I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP

Art Unit: 1654

§ 806.05(h)). In the instant case the protein of group I can be used in immunoassays, binding assays or as a molecular marker.

Inventions of Groups II-III are different invention wherein the methods require different steps and components and have different end results.

3. Because these inventions are distinct for the reasons given above and the search required for one group is not required for the other groups, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
